## MineARC® ROCK BOLT CUTTER

**NO GRINDING OR OXYCUTTING**

**NO HOT WORK PERMIT REQUIRED**

**CUTS THROUGH GEWI BARS  
AND CABLE BOLTS IN SECONDS!**

**MineARC® Systems** has developed a safe and simple method for the cutting and removal of tails from roof bolts.

### MINEARC® SYSTEMS ROCK BOLT CUTTER

Traditionally the task of cutting gewi bar and cable bolt tails has been a challenging and dangerous exercise with operational and safety concerns associated with grinding and oxycutting.

MineARC's hydraulic Rock Bolt Cutter has been developed in conjunction with major mining and contracting companies to be safe, easy to use, lightweight and yet still powerful enough to cut Gewi Bars and Cable Bolts within 20 seconds.

### FEATURES

- ▶ Safe to use
  - ▶ No grinding or oxycutting
  - ▶ Quick and easy to use (20 sec)
  - ▶ No 'Hot-Work Permit' required
  - ▶ Cuts through 25mm gewi bars
  - ▶ Cuts through 25mm cable bolts
  - ▶ Removable cutting head and die
  - ▶ Connects to any hydraulic power supply
  - ▶ Designed and manufactured in Australia
  - ▶ 7000 PSI maximum
  - ▶ Lightweight – only 9kgs
  - ▶ Removable handle
  - ▶ Two person operation
  - ▶ Quick release couplers
- (Power pack not included)
